Re: Mr. Dalio & Bridgewater:

Bridgewater: Ray Dalio: Sincere or Fake: 'Greatest Tragedy is Mans inability to have thoughtful disagreement about what is true?'

Was your statement – “The greatest tragedy of mankind, comes from the inability of people to have thoughtful disagreement to find out what's true” -- quoted in Business Insider: [Billionaire Ray Dalio had an amazing reaction to an employee calling him out on a mistake](#); sincere?

If so: Why did nobody at Blackwater ever respond to my correspondence to Blackwater: [Error in Bridgewater Publication: A Template for Understanding What's Going On: How the Economic Machine Works: Disregard for Peak Oil and Peak Non-Renewable Natural Resources as the Ecological Foundation of Economic and Political Reality?](#)

If you or anyone at Bridgewater sincerely do believe that “The greatest tragedy of mankind, comes from the inability of people to have thoughtful disagreement to find out what's true”; you are welcome to provide your brutally honest feedback to the Ecology of Peace v Masonic War is Peace NWO negotiations.

More Info on EoP v WiP NWO negotiations: Culture Change to EoP Honour Eco-footprint Shrinking Lifeboat Ethics?

The following are excerpts from [EoP MILED Clerk](#) EoP v WiP Negotiations correspondence and [EoP NWO social contract options](#) legal applications documentation.

* ~~~~~ *

“Simplistically Military Biological / Chemical etc Warfare is simply a form of culling and resource theft warfare between tribes living on a finite resource planet, managed by a ‘flat earth social contract’. Put simply it is the result of an absence of an international Ecology of Peace social contract, requiring all the worlds tribes to breed and consume below carrying capacity limits. A peace or reconciliation treaty that ignores finite resource reality as the foundation for its procreation and consumption social contract duties imposed on all signatory parties; is not a sincere peace or reconciliation treaty, because it totally and utterly ignores the ecological finite resource reality foundation and citizen procreation and consumption duties required for peaceful co-existence amongst tribes. To the contrary, such a ‘War is Peace’ peace or reconciliation treaty is simply a psycho-polegal – soma-pacification, or Trojan horse bullshit the public relations psychological warfare – resource theft tactic.”

Suggested Definitions:

Breeding/Consumption Scarcity Combatant Parties to the Conflict:

Any individual, organisation or nation whose procreation or consumption footprint violates its commons carrying capacity limits; should be designated as a ‘breeding/consumption’ scarcity combatant party to any local, regional, national or international resource scarcity related conflict.

Breeding/Consumption Weapons of War:

“We must all understand that the most potent weapons of war are the penis, the womb, and the ego. Therefore, if you cannot convince a group to control its population and consumption, to below carrying capacity limits; by discussion, debate, intelligent analysis, etc.; you must consider their action in using the penis and the womb to increase population; or using the ego to consume in violation of carrying capacity limits; an Act of War” – Amended version of quote by Judge Jason G. Brent, in *Humans: An Endangered Species*.

Biological Warfare:

Biological Warfare is simply a symptom of breeding and consumption biological behaviours. The most dangerous root cause biological warfare ingredients are (a) male sperm; (b) female ovaries; and (c) ego-gender insecurity memplexes that have hijacked our brain-matter/minds; to engage in breeding war and consumption warfare behaviour; resulting in ecological overshoot, standing armies and finally military biological warfare.

Chemical Warfare:

Chemical Warfare is simply a symptom of breeding and consumption chemical behaviours. The most dangerous root cause chemical warfare ingredients are (a) male sperm; (b) female ovaries; and (c) ego-gender insecurity memplexes that have hijacked our brain-matter/minds; to engage in breeding war and consumption warfare behaviour; resulting in ecological overshoot, standing armies and finally military chemical warfare.

Fraud of UN 'Peace' and 'War' Treaties:

Any United Nations endorsed international treaty related to 'war' or 'peace' that ignores specifically addressing the breeding war and consumption war violation of carrying capacity limits root causes of ecological overshoot, which subsequently manifests as cannon fodder standing armies and their creation of military chemical, biological, technological, electronic and other related warfare ingredients, is based upon deception and fraud..

* ~~~~~ *

Put simply: Europe, Africa, Eurasia, America: All of humans on Planet Earth's choices are between Ecology of Peace humane, orderly and relatively non-violent deindustrialization and depopulation; and Masonic War is Peace extremely violent Mad Max race wars, religious wars, four horses of the apocalypse Armageddon deindustrialization and depopulation.

It is true that when the European Union and World economy collapses; perhaps together; perhaps subsequent to each other by a few years [[Meltdown](#)]; the socio-economic conditions shall result in the rise of either Masonic 'left: communist' or 'right: national socialist' wing War is Peace populist extremist political parties. Irrespective of whether the extremist populist party in any particular nation is 'left' or 'right'; that Masonic War is Peace populist extremist party shall need to engage in culling of the populace; to reduce the nations populace to levels closer to ecological carrying capacity limits. Both left and right wing Masonic War is Peace extremist populists shall have their respective 'racial, cultural or religious trash' [[Soviet Story](#)] whom they shall cull from their national genepool; whether via Stalinist Ukraine like famine; or Siberian concentration camps [[Soviet Story](#)]; or Nazi-like concentration camps [[Jesuit Nazi Final Solution](#)]; or American version Fema camps; or simply quickly and brutally Hutu-Tutsi style [[Hutu-Tutsi](#)]. There shall be mass culling. The decision-making about whom should and should not be culled; will not be based upon any racial, cultural, religious impartial 'rule of culling law' principle; but on the emotional hatred zeal of those in power; against perceived racial, religious or cultural group enemies; with no consideration whether individuals within that racial, religious or cultural group are guilty of the crimes; that some of their fellow racial, religious or cultural members are perceived to be guilty of by the respective Masonic Right/Left Extremist elite.

"Left right or right wing Capitalist WiP economic and population growth destroys the environment decreasing the nation's resources. Left or Right wing Communist or National Socialist WiP economic and population growth destroys the environment decreasing the nation's resources. The only difference is that Left or Right wing Capitalist growth does it faster and with greater economic inequality. When nations choose to follow a Masonic capitalist, communist, socialist, libertarian, Stalinist, nazi 'right to breed/consume above ecological carrying capacity limits' economic growth or population growth plan; they are buying a ticket on

the Titanic. Whether they purchase a Left or Right Wing Neo Conservative/Liberal capitalist first-class or Left or Right wing Extremist Marxist/Nazi communist/national socialist third class steerage Titanic ticket is irrelevant. They are purchasing a ticket on the Titanic where the end sinking of the WiP capitalist/communist titanic economy; and mass covert or overt culling of 'racial trash' result is the same." – amended quote of Albert Bartlett; [Arithmetic, Population and Energy](#).

“The teachings of Marx and Engels were carefully studied by Lenin; the man who established the first Marxist country on Earth. One year after Lenin’s death in 1924, the New York Times published a small article, which at the time went almost unnoticed: "Hitlerite Riot In Berlin: Bear Glasses Fly When Speaker Compares Hitler and Lenin. It was about some newly established party in Germany. Berlin, Nov 27: The National Socialist-Labor Party, of which Adolph Hitler is patron and father, persists in believing Lenin and Hitler can be compared or contrasted in a party meeting. Two weeks ago an attempted discussion of this subject led to one death, sixty injuries and GBP 3,000 damages to beer glasses, tables, chairs, windows and chandeliers in Chemnitz. Last night Dr Goebels tried the experiment in Berlin and only police intervention prevented a repetition of the Chemnitz affair. On Dr. Goebels assertion that Lenin was the greatest man, second only to Hitler, and that the difference between communism and the Hitler faith were very slight, a faction war opened with whizzing beer glasses." Amazing. A Future Nazi propaganda minister Goebels was openly declaring that the difference between Lenin's communism and the Hitler faith was very slight.” -- [The Soviet Story](#).

Sincere EoP or WiP Fraud: Never Had Before Democratization Discussion?:

Put differently: A ‘democratization discussion that you have never had before about European Union economic problems’ is an excellent idea; **IF** your discussion is focused on brutal honestly (a) confronting and addressing the root Masonic War is Peace ‘right to breed and consume with total disregard for ecological carrying capacity limits’ causes of – [ecological overshoot](#) resource depletion [tipping points](#) and [resource conflict](#) – which are manifesting as their overpopulation and consumption socio-economic and psycho-political problems; and (b) implementing a fair, honourable and transparent deindustrialization and depopulation policy; based upon impartial easily verifiable factors that clearly delineate which individuals; irrespective of race, religion, class or culture; should be eliminated from the national genepool; when, where, how many; how and by whom.

If your ‘democratization discussion that you have never had before about European Union economic problems’ does not include discussion of the root overpopulation and consumption causes of those socio-economic problems; your ‘democratization’ discussion is not ‘a new discussion that has never been had before’. It shall just be another ‘[Its not about the Nail](#)’ Masonic War is Peace pretend we give a fuck about problem solving; while doing fuck all about solving the root causes of our socio-economic problems; instead aggravating the root causes so we can parasitically socio-politically ego Mindfuck profit from them:

- “Paris is choking with ego fuck honour White, Black, Chink, Paki, Coolie, Kike Power environmental moral supremacists pretending they give a fuck about climate change; who will continue to whine and whine and whine and whine and whine and whine and whine about climate change, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, climate change, feminism, nazism, Islamism, capitalism, communism, militarization of police, etc; while

doing sweet goddamn fuck all about the Masonic War is Peace right to breed/consume with total disregard for ecological carrying capacity limits international law social contract; that is the root cause of everything they whine about.” [PDF]

- New Zealand is currently choking with Fuck Honour TPP Ego Supremacists pretending they give a fuck about a stable sustainable economy; who will continue to whine and whine and whine and whine and whine and whine about economic collapse, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, climate change, feminism, nazism, Islamism, capitalism, communism, militarization of police, etc; while doing sweet goddamn fuck all about the Masonic War is Peace right to breed/consume with total disregard for ecological carrying capacity limits international law social contract; that is the root cause of everything they whine about.” [PDF].
- Harney Co. choking with Fuck Honour Liberty Valance Cuntstudushin moral supremacists pretending they give a fuck about peace and justice; who will continue to whine and whine and whine and whine and whine and whine and whine about authoritarian militarized government land grabs, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, climate change, feminism, nazism, Islamism, capitalism, communism, militarization of police, etc; while doing sweet goddamn fuck all about the Masonic War is Peace right to breed/consume with total disregard for ecological carrying capacity limits international law social contract; that is the root cause of everything they whine about.” [PDF]

If the nail-problem you are hammering is to abolish the Masonic War is Peace social contract and replace it with an Ecology of Peace social contract; then that nail is simultaneously addressing a multitude of ecological overshoot problems: whether crime and violence, unemployment and poverty, food shortages, inflation, political instability, loss of political freedoms, conformist political correctness, vanishing species, garbage and pollution, urban sprawl, traffic jams, toxic waste, resource depletion, etc. Put simply the nail is in the bulls eye target zone, and each hammer strike, sends problem solving solution ripples to each of all of these problems; whereas if you focus your nail-problem hammering in War is Peace ‘racial, ideological, cultural, religious, economic etc’ symptom zones; each hammer strike is pointless; because in the absence of addressing the root cause of the problem: Masonic War is Peace ‘right to breed/consume with total disregard for ecological carrying capacity limits’ social contract; the particular problem you are focused on is only going to get worse; as the tap of overpopulation / overconsumption-ecological overshoot resource scarcity grows and grows and grows.

“...an organization cannot have a conservation policy without having a population policy....the sanity test — in which the candidate, confronted with an overflowing sink, is classified according to whether he reaches for the faucet or the mop.” -- Daniel B. Luten; as quoted by William Milton Cooper in *Behold a Pale Horse*.

Sincere Honour EcoFootprint Shrinking Lifeboat Ethics Root Cause Problem Solving Legal Discussion:

I don't know if you are aware of this information; but [Ecology of Peace culture has been having a legal discussion that has never been had before, since 18 June 2002](#); focused on the root causes of all the aforementioned socio-economic and psycho-political problems being whined about; i.e. about reforming or abolishing the 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses of the international law social contract; and [options for implementing an Ecology of Peace international law social contract](#); that requires all the worlds citizens from all races, religions and cultures to procreate and consume below ecological carrying capacity limits.

Here follow excerpts:

Are you willing to change the conversation; to have a conversation that has not been had before; to have a conversation about – [ecological overshoot](#) resource depletion [tipping points](#) and [resource conflict](#) – national resource shrinking lifeboats decision-making about 'whom should be removed from the lifeboat aka national genepool; how should they be removed; how many should be removed; by whom and when should they be removed'?

Put Simply: Do you want a Culture Change by reaching for the faucet to engage in an EoP Honour EcoFootprint Shrinking Lifeboat Ethics discussion; or is your 'culture change' rhetoric just verbal diarrhea pretend culture change; while you stay stuck in your 'Suck my - WiP human sacrifice to the EgoPhallic Gods – Dick; bitch' fragile ego Masonic culture?

EoP support and cooperate with any [human factory farming slavery enslavement](#) John Brown, [William Wilberforce](#), [Eric Liddle](#), Frederick Douglass, [Noel Ignatiev](#) or [Thomas Sankara](#) abolitionist; willing to (a) legally and publicly confront the [phallic human sacrifice War is Peace](#) 'right to breed and consume with total disregard for ecological carrying capacity limits' foundation of our secular or theocratic – capitalist, communist, libertarian, socialist, Christian, Muslim, Catholic, Buddhist, etc – religions and national social contract constitutions; (b) to have the courage to give up their addiction to [false left and right wing moral supremacist bullshit propaganda](#) and its individual and/ corporate political bribery welfare at the expense of the ecological resource commons that provides all human and animal species with survival sustenance; to (c) engage in a legal discussion about options to cooperation with national and international authorities to – hopefully nonviolently – [implement an Ecology of Peace](#) international law social contract that requires all the worlds citizens from all races, classes, religions and cultures to procreate and consume below ecological carrying capacity limits.

* ~~~~~ * * ~~~~~ *

Culture Change to EoP Honour Ecofootprint Shrinking Lifeboat Ethics:

In Garrett Hardin's: [Living on a Lifeboat](#) and [Lifeboat Ethics: The Case Against Helping the Poor](#); the basic access to resources leadership decision was 'nations resource lifeboat is not full yet, whom of those drowning in the water; should we give the opportunity to get into our national lifeboat; and whom should we just allow to drown'.

In US Army's Lifeboat Ethics while not explicitly stated in the course material; that – in terms of **ecological overshoot** resource depletion **tipping points** and **resource conflict** – all nations on Earth's resource lifeboats are not only full; but shrinking so now the decision is not 'whom to let in' but 'whom should be removed from the lifeboat aka national genepool; how should they be removed; how many should be removed; by whom and when should they be removed'?

Ecology of Peace v WiP NWO Shrinking Lifeboat negotiations questions:

This is a similar question to two EoP v WiP NWO negotiations questions [[PDF](#)]:

- V. Putin: New-EoP-Gotit or [current Masonic] No-Los-Pepes Evacuation Rules?
- A. Muhrteyn: Revolution in Military Ethics question: Defining just and unjust actions in war and military conflict: the operative question: Whom should the military kill?

Summary: Ecology of Peace Culture Shrinking Lifeboat Ethics Answers:

The Ecology of Peace culture's answer to these shrinking lifeboat questions:

Summary:

Whom should be removed from the lifeboat/national genepool & how many should be removed:

- All citizens from whatever nation, race, religion or class whose procreation and/or consumption has been and is above ecological carrying capacity limits; who refuse to commit in writing to reduce their consumption and/or procreation to ecological carrying capacity limits; should be evacuated from the planetary genepool lifeboat by national criminal justice government departments.

How should they be removed from the national genepool; by whom, how many and when should they be removed'?

- Worlds Attorney Generals should cooperate to implement an Ecology of Peace international law social contract that requires all the worlds citizens to procreate and consume below ecological carrying capacity limits.
- Once implemented: all citizens from whatever nation, race, religion or class whose procreation and/or consumption has been and is above ecological carrying capacity limits; who refuse to commit in writing to reduce their consumption and/or procreation to ecological carrying capacity limits; should be evacuated from the planetary genepool lifeboat by national criminal justice government departments.
- If or where any nation's Attorney General obstructs the implementation of Ecology of Peace international law social contract; they should provide reasons for their legal obstruction behaviour to the International Criminal Court; and/if or when they refuse to do so; should be coerced into doing so by the implementation of EoP Axis Military Necessity Mutual Coercion Psychotronic Evacuation processes which shall psychotronically evacuate lotto nations scarcity combatant and breeding/consumption war citizens who have not signed EoP Axis Oaths from the planetary genepool.

More Info: Ecology of Peace Culture Shrinking Lifeboat Ethics Answers:

Aforementioned Ecology of Peace shrinking lifeboat ethics [PDF] answers can be found in greater detail in — *EoP WiP negotiations: Cop21* [PDF]; TPP [PDF]; USA v A Bundy et al [PDF]; — correspondence; and [Ecology of Peace options](#) to politically, legally and/or militarily implement an Ecology of Peace International law social contract documents. EoP options being: [Amendment of UN Prisoner of War Treaty](#); [EoP Referendum](#); [EoP ICC Complaint](#) and [EoP Military Necessity Mutual Coercion Psychotronic Evacuation](#); excerpts of which follow:

* ~~~~~ * * ~~~~~ * * ~~~~~ * * ~~~~~ *

Green Industrial Economy Fraud:

The Green Industrial Economy is impossible because of [Peak Non-Renewable Natural Resources](#); as comprehensively detailed by Christopher Clugston; in *Scarcity: Humanity's Last Chapter: A Comprehensive Analysis of Nonrenewable Natural Resource (NNR) Scarcity's Consequences*.

Scientists Denial of Procreation Factor in carbon or eco-footprint measurements:

See for example: * Study of [Paul A. Murtaugh](#), Michael G. Schlx (2009): *Reproduction and the carbon legacies of individuals*; Global Environmental Change, 19 (2009) pp. 14-20; Every Child Increases a Woman's Carbon Footprint by a factor of 20: A woman can reduce her carbon footprint 19 times more by having one fewer child than by all other energy efficiency actions the E.P.A. suggests combined; * Al Bartlett: [China One Child Policy climate change negotiation arguments](#). * BBC Africa: [Ghanaian Cardinal says birth control could offer solution to climate change](#); * 2010: Thou Shalt Not Breed: Anglicans; copy available at: [Mencken -- Licensed to Breed DieOff – Monkeylaw Prophets](#); * ECSP: [Environmental Researchers and the Touchy Topics of Family Planning and Population](#).

* ~~~~~ *

General Mike Flynn: [You can't defeat an enemy you don't admit exists](#).

Any form of capitalism that allows citizens to procreate and/or consume above ecological carrying capacity limits; cannot – according to Tragedy of the Commons principles – do anything else but degenerate into predatory capitalism aka fascism. Of interest regarding the future impending consequences of planetary predatory capitalism: Real News: [Paul Jay's Reality Asserts Itself: Who Makes US Foreign Policy interview of Lawrence Wilkerson](#); particularly the [predatory capitalism](#) part; which deals with the necessity of the great powers cooperating to implement a new economic order; to address the massive impending planetary social conflict problems resulting from climate change, peak food, peak water, peak oil, including how and where to bury 6 billion people.

“If you can't explain it simply, you don't understand it well enough.” - Albert Einstein

1. Economic inequality; psycho-social resource conflict conformity pressures; climate change, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, nation states standing army or dissident guerrilla army 'terrorism' resource war military aggression, etc – are a direct and indirect consequence of overpopulation and overconsumption.

2. Overconsumption and overpopulation are a direct consequence of humans procreating and consuming above ecological carrying capacity limits.
3. Humans procreate and consume above ecological carrying capacity limits because the current international law social contract; allows nation states to provide their citizens with the implied 'right to breed and consume with total disregard for ecological carrying capacity limits'.
4. Humans will stop procreating and consuming above ecological carrying capacity limits when legislators amend the current international law and national constitutional social contract statutes that enable procreation and consumption above ecological carrying capacity limits; to specifically require all the worlds/their nations citizens to procreate and consume below ecological carrying capacity limits.

In the – amended – wording of Dr. Al Bartlett: Living on a planet where cultures are based upon Masonic War is Peace right to breed/consume social contract principles is like buying a ticket on the Titanic; if you're smart you go Capitalist first class; or you can go cheap Communist or Primitivist steerage third class. In all cases, the sinking of the culture from ecological overshoot resource depletion result is the same. But if the social contract gives the people the choice, most people would go fast, flashy and first class.

As reported in Nasa funded [Human \(Predator\) and Nature \(Prey\) Dynamics \(HANDY\) studies](#): Humans who engage in [totalitarian agriculture](#), engage in Predator-Prey Growth and Collapse of Civilization/Empire cycles: Greco-Rome, Minoan, Mycenaean, Sumerians, Akkadian, Assyrian, Babylonian, Achaemenid, Seleucid, Zhou, Han, Tang, Song, Parthian, Sassanid, Umayyad, Abbasid, Mauryan, Gupta, Maya, Hittite, Harrapan and Teotihuacan. Collapses result from (1) Ecological Strain and (2) Economic Stratification and include the disappearance of between 90-99% of the populations (from famine, disease and organized violence resource wars) including their kings, Gods, calendars and other complex political and cultural institutions.

Economic Stratification Collapse occurs due to unequal consumption of resources generating Elites vs Commoners. As Elites become sizable and keep growing, they consume more; their over-exploitation results in collapse of resources to the Commoners; who experience famine and collapse. Elites -- due to their wealth -- do not suffer the detrimental effects of environmental collapse until much later than Commoners, which allows them to continue 'business as usual', despite the impending catastrophe; explaining how historical collapses were allowed to occur by seemingly oblivious elites (eg Roman & Mayan cases).

As clarified by Garrett Hardin in [Tragedy of the Commons](#); in the absence of a social contract that eliminates 'breeding/consumption' cheaters from the genepool; a social contract that provides for no 'elimination from the genepool' consequences for 'breeding / consumption war cheaters; effectively results in other members of the culture being forced to engage in breeding / consumption war cheating; for offence or defence of their resources purposes; which sets in motion a breeding / consumption war ratrace. This reality was observed shortly after the invention of totalitarian agriculture; and the elite of the time decided rightly or wrongly that their only option was for the elite to [divide and conquer](#) manage and profit from the 'breeding / consumption war'; which is one of the 'human sacrifice' 'secrets' of '[oroborous mystery phallic worship religions](#)'.

If economists and journalists are sincere about establishing an economic system based upon resource footprint morality; and abolishing the [human factory farming slavery](#) system; they need to confront Ecology of Peace Factual Reality: (a) Earth is not flat; (b) Earth renewable and non-renewable resources are finite; (c) When humans breed or consume above ecological carrying capacity limits, it results in resource conflict; (d) To sustainably protect and conserve natural resources in accordance to [local and national carrying capacity limits](#); and restrict [national and international inter-cultural resource war conflict](#); humans must implement an [Ecology of Peace](#) international law social contract that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits.

~~~~~

All ideas are not equal.

If some Vietnam Phoenix project terrorists have thrown you out of a plane with a parachute; but you don't know how to work a parachute; then the idea of *'I better think about how to pull the ripchord for my parachute so that I can defy gravity with a scientifically proven method of defying gravity: namely a parachute'* and *'I can defy gravity with some Masonic verbal gymnastics; and once I have redefined gravity so that it does not apply to fuck honour tits and ass kikes New Yorkers; God will amend gravity in accordance to my Masonic law new definition demands'* are not equal.

“Paris is currently choking with ego fuck honour White, Black, Chink, Paki, Coolie, Kike Power environmental moral supremacists; who will continue to whine and whine and whine and whine and whine and whine about food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, climate change, feminism, nazism, Islamism, capitalism, communism, militarization of police, etc; while doing sweet goddamn fuck all about the Masonic War is Peace right to breed/consume with total disregard for ecological carrying capacity limits international law social contract; that is the root cause of everything they whine about.”

Put differently:

If the Cop 21 Secretariat gave a fuck about beginning to educate yourselves, those attending your 'Climate Change Conference', journalists and the worlds citizens about the scientific ripchord as opposed to the Masonic verbal gymnastics information regarding root causes of Climate Change: namely overpopulation and overconsumption; whose causes are the [Masonic War is Peace](#) -- right to breed and consume with total disregard for [ecological carrying capacity limits](#) -- international law social contract; you would have invited any one of the following speakers to present their information; to begin the educational persuasion process as to how and why it is a matter of [military necessity](#) to implement an [Ecology of Peace](#) international law social contract; that restricts all the worlds citizens from all races, classes and religions to breeding and consuming below [ecological carrying capacity limits](#).

Current International Law Right to Breed & Consume:

There are many examples of current international law statutes that directly and indirectly provide citizens with the right to breed and/or consume above ecological carrying capacity limits; and lawyers, prosecutors and Judges who apply them, all while pretending their courts are concerned with ‘truth’ and ‘evidence’; pretending they have fuck all clue why and how those statutes result in food shortages & inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources and climate change; inter-racial, religious and cultural social conflict; psycho-social conflict; not to mention overpopulation and consumption resource depletion and scarcity induced [resource wars](#); which sometimes manifest as genocide and holocausts.

Put simply: unlike [Arthur Edens](#) and [Michael Clayton](#) – they are in total denial that they are Sheva the legal cryptic gods of death.

[..]

Summary of the origins and practices of Sheva & Lucifer the cryptic gods of death:

The following are – in my view relevant excerpts from – EoP PoW et al -v- Norwegian Nobel Committee et al; for your consideration:

-----Excerpt: EoP PoW et al -v- Norwegian Nobel Committee et al -----

AnthroCorpocentric Jurisprudence’s Innocence for Sale Indulgence Legal Matrix:

“Corporations are a Frankenstein monster which States have created by their corporation laws.” - Supreme Court Justice Louis D. Brandeis, 1916

“Every right must be evaluated in the network of all rights claimed and the environment in which these rights are exercised. If we hold that every right, “natural” or not, must be evaluated in the total system of rights operating in a world that is limited, we must inevitably conclude that no right can be presumed to be absolute, that the effect of each right on the suppliers as well as on the demanders must be determined before we can ascertain the quantity of right that is admissible. From here on out, ours is a limited world. Rights must also be limited. The greater the population, the more limited the per capita supply of all goods; hence the greater must be the limitation on individual rights, including the right to breed. At its heart, this is the political meaning of the population problem.” – Garrett Hardin, Limited World, Limited Rights

Civilized Patriarchy’s Legal Matrix Reality doctrine -- the Inalienable ‘Right to Breed and Consume, but you need a License to Own a Gun, a License to Drive a Car, a License to Practice Law, a television license, a credit license, a license to earn a living, a university exemption license, a license to fish, a license to hunt, a liquor license, a business license, a marriage license, in some U.S. states, five year olds, even need to get a license to run a lemonade stand on their front lawn -- hypocritically referred to as the ‘rule-of-law’ is a legal world of lawyers, politicians and priests, who prefer to negligently ignore, plausibly deny, or socio-psycho-phallicly benefit from the conquer-and-multiply and divide and conquer control over the means of human reproduction and consumption. It is a Matrix reality, of legal, political and religious indulgence salesmen.

It is a legal world, very similar to the Matrix religious world that existed before Martin Luther confronted the religious indulgence salesmen with his Ninety-Five Theses, on the Church of All Saints, on 31 October 1517, thereby initiating the Protestant Reformation.

In the Catholic Church’s religious Matrix world, only Catholic Bishops were entitled to be interpreters of the ‘word of god’. Only they could decide what God meant, about who was guilty and who was innocent, who would go to hell and who would go to heaven. God did not speak to common people, except via the Catholic Church’s bishops.

In Civilized Patriarchy’s Legal Matrix world, only those who swear blind obedience to Civilized Patriarchy’s Legal Matrix world – lawyers, prosecutors and judges – are deemed to possess the supposed superior intellectual Legal Godlike capabilities, to decipher, decode and interpret the ‘word of civilized patriarch gods’, hence capable of deciding which of us mere Commons surplus cannon fodder mortals acts of commission, or omission, is ‘lawful’ or ‘unlawful’.

Civilized Patriarchy's Legal Matrix 'AnthroCorpocentric law' is based upon Flat Earth 'jurisprudence', as per the demands of those capable of purchasing Flat Earth legislation indulgences which make their ecologically – breeding/consumption war -- criminal acts, to be deemed as 'legal/lawful' conduct by the Legal Matrix Bishops: lawyers, prosecutors and Judges.

It is a Matrix world of legal indulgence salesmen; who -- 'Contempt in Facie Curiae' -- demand the public's sycophantic submissive obedience; for their supposed superior intellectual Godlike capabilities, to decipher, decode and interpret which of us mere Commons surplus cannon and vote fodder mortals acts of commission, or omission, is 'lawful' or 'unlawful'.

Thieving, Conquering, Murdering and Culling Acts of Un/Lawfulness:

"Military men are just dumb, stupid animals to be used as pawns in foreign policy." - Henry Kissinger; *The Final Days*, by Bob Woodward & Carl Bernstein

Surplus vote fodder citizens may convert to becoming cannon-fodder citizens by joining the military to commit conquering or culling acts of murder and theft, as long as their murder and theft is sanctioned as a lawful conquer, culling or theft order, by one or more groups of left/right conquer-and-multiply legal indulgence salesmen.

In this Matrix Reality legal world, soldiers tasked with the national security conquering and culling responsibilities, of conquering to thief another tribe's resources, and culling population 'useless eaters' and 'oxygen thieves' surplus population excesses; on behalf of the conquering and culling profiteering demands of civilized patriarchy's civilian corporate and political elite; constantly find themselves confronted with the conquer-or-culling "Befehl ist Befehl" Catch 22 dilemma:

To obey, or not to obey, a 'Lebensraum', 'Difaqane', 'Operation Freedumb' and the thousands like them, order to conquer or cull; since a lawful conquer or culling order, by one group of left/right conquer-and-multiply legal indulgence salesmen, can easily be reinterpreted to be an unlawful order, by another group of opposing left/right conquer-and multiply legal indulgence salesmen; presenting a Catch 22 dilemma from which there is no legal escape.

One who refuses a 'lawful' conquering or culling order will still probably be jailed for refusing orders, and one who accepts an 'unlawful order will be jailed for committing unlawful culling or conquering acts.

Who decides, what is, and what is not, a conquering or culling *lawful*, or *unlawful* order?

The 'Inalienable Right to Breed' Matrix Reality conquer-and-multiply indulgence salesmen, with their specious justifications, and nightmare of Legal Matrix reality generated bureaucratic stare-decisis cryptic rules and statutes, of course!

"I don't know what you mean by 'glory,'" Alice said.

Humpty Dumpty smiled contemptuously. "Of course you don't—till I tell you. I meant 'there's a nice knock-down argument for you!'"

"But 'glory' doesn't mean 'a nice knock-down argument'," Alice objected.

"When I use a word," Humpty Dumpty said, in rather a scornful tone, "it means just what I choose it to mean—neither more nor less."

"The question is," said Alice, "whether you can make words mean so many different things."

"The question is," said Humpty Dumpty, "which is to be master—that's all."

-- Through the Looking Glass, by Lewis Carroll

Anthropocentric Master's of 'Relevance' Jurisprudence:

The question in a civilized patriarchy court is only concerned with who is the master of one word: *'relevance'*.

Any question or answer that exposes civilized patriarchy's Legal Matrix system for what it is; a system far more corrupt than the Catholic Church's Indulgences for Sale religious matrix, is simply deemed as 'irrelevant'.

It is 'irrelevant' that legislators, lawyers, courts and judges defy the laws of ecology with a massive 'fuck you', by legislating, interpreting and enforcing Legal Matrix doctrine, that encourages citizens to breed and consume above cultural carrying capacity limits.

It is 'irrelevant' that legislators, lawyers, courts and judges know that legislation which ignores carrying capacity limits results in ecological overshoot, surplus vote-cannon-fodder populations, economic hierarchical inequality, and scarcity induced local, national and international conflict.

It is 'irrelevant' that legislators, lawyers, courts and judges know that legislation which enables ecological overshoot in multi-cultural/ethnic/religious communities, manifests as inter-cultural / ethnic / religious conflict.

It is 'irrelevant' that legislators, lawyers, courts and judges know that inter-cultural / ethnic conflict is a great divide and conquer tool to manipulate the proletariat to perceive other cultural/ethnic proletariat as the source of their own overshoot-scarcity-conflict misery.

It is 'irrelevant' that legislators, lawyers, courts and judges sit in judgement about an accused's case of theft or murder; while consciously ignoring the theft and thievery and participation in mass murder of the civilized patriarchy corporate elite, who purchased 'Innocence for Sale' Indulgences from legislators to avoid legislation that defines their ecologically criminal acts of billion and trillion dollar thievery and murder as 'unlawful'.

What is relevant?:

It is relevant that civilized patriarchy's penis constitutions human factory farming rights to breed and consume, is to be master —that's all.

Who says so?:

Civilized Patriarchy's ecologically illiterate Legal Matrix Legislator's, lawyers, judges and prosecutors ego-genitals say so!

[..]

Totalitarian Agriculture as the source of Taker resource scarcity social-conflict contract problems:

The problems with Taker social contract occurred with the invention of Totalitarian agriculture; which describes the behaviour of humans who violate their original indigenous tribal territory's by choosing to engage in surplus food production (economic growth); resulting in surplus human (population growth).

When any tribe of humans overbreed and/or overconsume the natural resources in their perceived tribal territory; they travel beyond their tribal territory to go and find resources they have over-consumed and degraded. When such a tribe enters another tribes territory, then conflict occurs (from economic, political to physical, an organized violence warfare). To limit inter-tribal territorial resource acquisition conflict, all tribes must agree to limit procreation and consumption to their tribal territory ecological carrying capacity limits.

Simplistically the history of war can be summed up as: Every single battle between two groups of racial, religious, ethnic, or ideological warriors, engaged in organized violence resource thieving or defence, since the advent of [totalitarian agriculture](#), was a result of one or both of those tribes having overbred and/or overconsumed, and engaging in resource thieving into another tribes territory.

Since the beginning of humans (whatever you believe that beginning to be) humans lived in nomadic hunter gatherer tribes, like the Bushmen, Aborigine's, etc. Male duties were to hunt and protect the tribe. Women's duties were to forage and nurture the young. Both men and women contributed to the tribe's economic resources and duties, hence power was shared reasonably equally. Tribes were concerned about not overbreeding; since such overbreeding resulted in the resources in a territory being depleted quicker, and less resources for the rest of the tribe; requiring them to move to new territories. After three million years of humans living like hunter gatherers, it is estimated that the human population at the beginning of the Neolithic period was around ten million.

Then things changed very quickly for the tribes who invented Totalitarian agriculture. Women invented agriculture, resulting from their close association and experimentation with seeds and plants, in their role as foragers. This change occurred because some tribes started practicing a particular form of 'surplus agriculture' (hereinafter referred to as 'totalitarian agriculture') where farmers grew large surpluses of stored food. The consolidation of agriculture results in the centralization of political power: cities & civilization. Before the discovery of oil and coal, the practice of totalitarian agriculture farming was far more labour intensive than hunting and subsistence farming; so men took over agriculture; and women were now relegated to being brood sows, to breed economic and cannon fodder: children to work in the fields or be soldiers. Surplus food meant that some members of the tribe could now work in other specialized fields: soldiers, clerks, etc; and also that the tribes could grow their tribes population. World population doubled in three thousand years; and again in only two thousand years. It jumped from ten million to fifty million—probably eighty percent of them being practitioners of totalitarian agriculture. It was getting crowded.

Beginning of War is Peace War resulting from overbreeding and overconsuming: In all of three million years, humans had never been crowded anywhere. But now the people of practicing totalitarian agriculture were learning what it means to be crowded. Overworked, overgrazed land was becoming less and less productive. There were more people, and they were

competing for dwindling resources; and people now began to organize their tribes into forms of standing armies to fight for land or resources. The tribes first war-making machinery: warlords—kings, princes, emperors and their nation states formed for the purpose of armed defense and aggression. “It’s during this period that we see the standing army forged as the monarch’s sword of power. Without a standing army, a king is just a windbag in fancy clothes. But with a standing army, a king can impose his will on his enemies and engrave his name in history—and absolutely the only names we have from this era are the names of conquering kings. No scientists, no philosophers, no historians, no prophets, just conquerors. For the first time in human history, the important people are the people with armies.”

Evolution of War is Peace War: Advancement and acquisition of Human and Military Technology and Capital vs Breeding of CannonFodder: In a battle between two armies with the same level of military skill and technology; generally the bigger army wins. Many of history’s military conquerors have relied on simply growing cannon fodder to slaughter on the battlefields to win their battles or wars. Some military conquerors focussed on improving their soldiers skills (psychological, physical, intellectual, spiritual, etc), technology (better armor, better swords, better chariots, better bows and arrows, better scaling machines, better rams, better artillery, better guns, better tanks, better planes, better bombs, better rockets, better nerve gas, better germs, better chemicals); and legal moral supremacist ‘innocence for sale’ indulgence interpretations psychological warfare doctrine. Many times small armies with greater technological equipment and/or military tactical or strategic skills won: There are many examples, but two are Battle of Blood River (guns), conquest of North and South America (guns, germs & steel).

WiP Resource Conflict: Initially economic, then political, and finally military organized conflict: Centuries of conflict over resources generated an international law social contract founded upon Masonic phallic force (rule of force international treaties); that rewarded those who engage in [seething energies of lucifer](#) breeding and consumption wars; which bribe their tribes members to believe it is their 'inalienable [freedumb slavery] right' to breed and consume above carrying capacity limits; while denying personal responsibility for the human factory farming organized violence conquer and culling racism, sexism, nationalism, socialism, capitalism, nazism, islamism, zionism, corporatism, stalinism, [human sacrifice culling](#), etc consequences; as people are motivated beyond retardation (motarded) to choose to join one or other ideological, religious, racial or cultural tribe to engage in resource war thieving to accumulate more resources to grow their tribe to enable it to protect itself from another tribes organized violence resource war thieving.

Totalitarian Agriculture’s Luciferian Evil Human Sacrifice Harvest Religions:

“When The Mason learns that the Key to the warrior on the block is the proper application of the dynamo of living power, he has learned the Mystery of his Craft. The seething energies of Lucifer are in his hands and before he may step onward and upward, he must prove his ability to properly apply this energy.” - Manly Palmer Hall,
Illustrious: the Lost Keys of Freemasonry

"in this case the defendants are not simply accused of planning or directing wholesale killings through channels. They are not charged with sitting in an office hundreds and thousands of miles away from the slaughter. It is asserted with particularity that these men were in the field actively superintending, controlling, directing, and taking an active part in the bloody harvest." - Nuremberg Military Tribunal, United States of America vs. Otto Ohlendorf, et. al. ("Einsatzgruppen trial"), Judgment.

All civilized religions — from Christianity, to Gnosticism, etc — were ‘created’ in the minds of man to comprehend the concept of ‘evil’ (aka organized violence), subsequent to man’s invention of agriculture, approximately 10,000 years ago; and where such agriculture created food surpluses, resulting in population surpluses, and expansion of their territory resulting in population pressure clashes with other tribes territories, resource war conflict.

Extended misery resulting from direct and psychic existential conflict resulted in man’s attempt to understand so-called ‘evil’; or put more simply: the organized resource thieving direct conflict (rape, murder, slavery, etc) resulting from population pressures and escalating relations with fellow humans based upon the absence of consent, i.e. extended periods of psychic and physical violence and coercion.

If there are two or ten people living on an island with enough food and other resources and space, for one hundred people; there is no need to coerce another for food or resources freely and abundantly available. In the absence of a resource scarcity conflict mindset, and plenty of space, tribal relations are more conducive to cooperation and sharing. Living in the moment. There is no need for an external God in the sky to explain ‘evil’; there is only a consciousness to appreciate the source of resource abundance, as the ‘source of life’; and to live in harmony with such source: nature. Violence is limited to food chain violence experienced by all species; namely hunting and being hunted by another predator for immediate food. [See also: Law of Limited Competition]

If the tribe introduces agriculture, which results in an agricultural surplus and uses such agricultural surplus to justify greater population; then as the population increases, so the population pressures increase. There is less space to run away from someone who may be temporarily angry, or wanting something another is not willing to provide in that moment. The existence of ‘evil’ (organized violence) is plausibly directly proportional to the resource war conflict, resulting from the tribe’s violation of carrying capacity limits; and/or coming into contact with another tribe’s territorial expansion as a result of their violation of carrying capacity limits. In attempting to understand the existential meaning of this symptom of ‘evil’ resulting from violation of carrying capacity limits resource war conflict, man created religions...

The invention of agriculture and agricultural surpluses, and subsequent organized violence of civilization are the biblical story of Adam and Eve’s loss of living in carrying capacity harmony with the natural world resource abundant paradise, and Cain’s choice to be a farmer. Others saw opportunities for socio-political status benefits from exploiting the reality of organized violence (evil), and suppressed this conscious reality of their intentions by invoking various phallic ‘right’ justifications for their ‘right’ to engage in organized violence (evil).

The Mason’s ‘seething energies of lucifer’ are the psychological warfare art of manipulating and coercing men and women to overbreed and overconsume, to thereby aggravate resource war conflict, and the ability to divide and conquer people’s, for the socio-political profit of the ‘warrior’, to ‘step onward and upward’; as he ‘proves his human sacrifice ability’ to apply his breeding war and consumption war energies. Put differently, the ‘seething energies of lucifer’ are no less than the phallic justification for profiting from aggravating and perpetuating deliberate organized violence, without the consent of the recipients of the violence.

Totalitarian Agriculture WiP Tower of Babel Empires that violently collapsed: Humans who engage in totalitarian agriculture, engage in Predator-Prey Growth and Collapse of Civilization/Empire cycles: Greco-Rome, Minoan, Mycenaean, Sumerians, Akkadian, Assyrian,

Babylonian, Achaemenid, Seleucid, Zhou, Han, Tang, Song, Parthian, Sassanid, Umayyad, Abbasid, Mauryan, Gupta, Maya, Hittite, Harrapan and Teotihuacan. Collapses result from (1) Ecological Strain due to procreation and consumption above ecological carrying capacity limits; and (2) Economic Stratification; and have included the disappearance of between 90-99% of their populations (from famine, disease and organized violence resource wars) including their kings, Gods, calendars and other complex political and cultural institutions.

-----End Excerpt: EoP PoW et al -v- Norwegian Nobel Committee et al -----

“Fate: Unintended Consequences: Catton: Seyright Mills of Columbia Univ's sociological definition of fate. Fate is what happens when innumerable people make innumerable small decisions about other matters that have the collective cumulative effect that nobody intended. That's what happened when we overpopulated the world. a fusion of forces that separated us from the laws of life... that told us that we could live apart from those laws of limits, without rules.” -- [What a Way to Go: Life at the End of Empire](#).

* ~~~~~ * * ~~~~~ * * ~~~~~ * * ~~~~~ *

If humane deindustrialization and depopulation is implemented internationally as per ***EoP Cop21 Simple Root Cause Problem Solving Recommendation*** [PDF] submitted to UNFCCC & Cop 21; and/or [EoP complaint to ICC](#); it would have greater positive effects on reforestation, biodiversity and climate change than the extremely violent depopulation implemented by Genghis Khan the Green; which only occurred in Eurasia; but resulted in massive reforestation and the plummeting of carbon levels.

Excerpts from: [Coupled climate–carbon simulations indicate minor global effects of wars and epidemics on atmospheric CO2 between AD 800 and 1850](#) study by Julia Pongratz; article: [Genghis Khan the GREEN: Invader killed so many people that carbon levels plummeted](#); [Carnegie: War, Plague No Match for Deforestation in Driving CO2 Buildup](#).

Genghis Khan has been branded the greenest invader in history - after his murderous conquests killed so many people that huge swathes of cultivated land returned to forest. The Mongol leader, who established a vast empire between the 13th and 14th centuries, helped remove nearly 700 million tons of carbon from the atmosphere, claims a new study. The deaths of 40 million people meant that large areas of cultivated land grew thick once again with trees, which absorb carbon dioxide from the atmosphere. And, although his methods may be difficult for environmentalists to accept, ecologists believe it may be the first ever case of successful manmade global cooling.

Genghis Khan and his Mongol hordes had an impact on the global carbon cycle as big as today's annual demand for gasoline. The Black Death, on the other hand, came and went too quickly for it to cause much of a blip in the global carbon budget. Dwarfing both of these events, however, has been the historical trend towards increasing deforestation, which over centuries has released vast amounts of carbon dioxide into the atmosphere, as crop and pasture lands expanded to feed growing human populations. Even Genghis Kahn couldn't stop it for long.

“It's a common misconception that the human impact on climate began with the large-scale burning of coal and oil in the industrial era,” says Julia Pongratz of the Carnegie Institution's Department of Global Ecology, lead author of a new study on the impact of historical events on

global climate published in the January 20, 2011, online issue of The Holocene. “Actually, humans started to influence the environment thousands of years ago by changing the vegetation cover of the Earth’s landscapes when we cleared forests for agriculture.”

Clearing forests releases carbon dioxide into the atmosphere when the trees and other vegetation are burned or when they decay. The rise in atmospheric carbon dioxide resulting from deforestation is recognizable in ice cores from Greenland and Antarctica before the fossil-fuel era.

But human history has had its ups and downs. During high-mortality events, such as wars and plagues, large areas of croplands and pastures have been abandoned and forests have re-grown, absorbing carbon dioxide from the atmosphere.

Pongratz decided to see how much effect these events could have had on the overall trend of rising carbon dioxide levels. Working with colleagues at the Max Planck Institute for Meteorology in Germany and with global ecologist Ken Caldeira at Carnegie, she compiled a detailed reconstruction of global land cover over the time period from 800 AD to present and used a global climate-carbon cycle model to track the impact of land use changes on global climate. Pongratz was particularly interested in four major events in which large regions were depopulated: the Mongol invasions in Asia (1200-1380), the Black Death in Europe (1347-1400), the conquest of the Americas (1519-1700), and the Fall of the Ming Dynasty in China (1600-1650).

“We found that during the short events such as the Black Death and the Ming Dynasty collapse, the forest re-growth wasn’t enough to overcome the emissions from decaying material in the soil,” says Pongratz. “But during the longer-lasting ones like the Mongol invasion and the conquest of the Americas there was enough time for the forests to re-grow and absorb significant amounts of carbon.”

The global impact of forest re-growth in even the long-lasting events was diminished by the continued clearing of forests elsewhere in the world. But in the case of the Mongol invasions, which had the biggest impact of the four events studied, re-growth on depopulated lands stockpiled nearly 700 million tons of carbon absorbed from the atmosphere. This is equivalent to the world’s total annual demand for gasoline today.

Pongratz points out the relevance of the study to current climate issues. “Today about a quarter of the net primary production on the Earth’s land surface is used by humans in some way, mostly through agriculture,” she says. “So there is a large potential for our land-use choices to alter the global carbon cycle. In the past we have had a substantial impact on global climate and the carbon cycle, but it was all unintentional. Based on the knowledge we have gained from the past, we are now in a position to make land-use decisions that will diminish our impact on climate and the carbon cycle. We cannot ignore the knowledge we have gained.”

Ecology of Peace DeIndustrialization and Depopulation Options:

Ecology of Peace Applicants have notified ICC Judges that they are currently searching for Assistance of Counsel [PDF] to file the [EoP complaint to ICC](#); to amend the current international law social contracts ‘right to breed and consume with total disregard for ecological carrying capacity limits’; causes of overpopulation and overconsumption.

Climate change as climate change scientists and activists may or may not be aware is not the only consequence of 'right to breed and consume with total disregard for ecological carrying capacity local, national and international law causes of overpopulation and overconsumption; but is but one of many consequences; others being: psych-social resource conflict conformity pressures aka political correctness, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, nation states standing army or dissident guerrilla army 'terrorism' resource war military aggression, etc.

As noted in Request for Assistance of Counsel to renowned Philippine's Environmentalist lawyer: Tony Oposa [\[PDF\]](#); if EoP Applicants cannot find any civilian attorneys to support their EoP ICC complaint; EoP Axis authorities can choose to implement the [military necessity](#) mutual coercion last resort option of the [Ecology of Peace NWO social contract options](#).

If EoP Axis authorities – Leaders of Russia, China, USA & NATO – and/or IL Coercion authorities choose to implement the [EoP Axis Military Necessity Evacuation](#) – as detailed in *26 September 2015 Military Necessity Evacuation Lotto Pool Notice to Nation State Supreme Court Judges & Attorney Generals of: Bahrain, Brazil; Brunei, Burundi, China, Germany, India, Japan, Kuwait, Luxembourg, Mali, Malta, Mexico, Monaco, Netherlands, Niger, Philippines, Qatar, Singapore, Somalia, South Korea, Uganda, United Kingdom, United States of America, Vatican City* [\[PDF\]](#); Proof of Service [\[PDF\]](#) – the first two countries on the EoP Axis Military Necessity Evacuation lotto are: Phillipines [\[PDF\]](#) and India [\[PDF\]](#).

Lotto Military Necessity Evacuation implementation shall result in half of India and Phillipines – or subsequent lotto draw nations – scarcity combatants and breeding/consumption war extremist's – whom Masonic War is Peace legislators, lawyers and judges formerly provided with [Breeding/Consumption Innocence for sale Indulgences](#) – being psychotronically humanely killed en masse; unless their city or the citizen has signed EoP Axis Oaths and provided such oaths to EoP Axis authorities as documented at [EoP Supporters](#).

An EoP Military Necessity Evacuation:

- (a) Scarcity combatant is any citizen who is a member of the following professions: (i) Law: Judges, Prosecutors & Lawyers; (ii) Mental Health: Psychologists & Psychiatrists; (iii) Media: Print, TV or Radio: Editors, Producers & Journalists; (iv) Religious & Non Profit: Officials and Employees of any religious worship or charity organization with State non-profit status.
- (b) Breeding / consumption war extremist is any adult individual over the age of 18 who has co-procreated more than 3 children who survived beyond the age of 5; and/or who possesses capital assets amounting to more than US \$ 2.55 million.

* ~~~~~ * * ~~~~~ *

What shall your ‘Environmental’; ‘climate change’ leadership decisions be:

New Ecology of Peace international law rules; or current Masonic War is Peace international law ‘WTF is the Befehl?’ confucius rules?

Do you sincerely want a change in Masonic War is Peace – pretend we give a fuck about economic inequality; psycho-social resource conflict conformity pressures; climate change, food shortages, food inflation, cost of living increases, urban sprawl, traffic jams, toxic waste, pollution, peak oil, peak water, peak food, peak population, species extinction, loss of biodiversity, peak resources, corporate and political corruption; nation states standing army or dissident guerrilla army ‘terrorism’ resource war military aggression, etc; while doing sweet fuck all about the root ‘right to breed and consume with total disregard for ecological carrying capacity limits’ international law social contract clauses – culture?

Are you willing to change the conversation; to have a conversation that has not been had before; to have a conversation about – [ecological overshoot](#) resource depletion [tipping points](#) and [resource conflict](#) – national resource shrinking lifeboats decision-making about ‘whom should be removed from the lifeboat aka national genepool; how should they be removed; how many should be removed; by whom and when should they be removed’?

A copy of this Comment Correspondence shall be documented in EoP v WiP negotiations: Comments Correspondence [[PDF](#)]; EoP Applicants: Req for Asst of Counsel: R. Abramovitch [[PDF](#)]; Applicants [[PDF](#)]: Charles H. Jacoby; James C. Bennett.

Respectfully,

Lara Johnstone, aka Andrea Muhrrteyn [EoP Oath [PDF](#)]

Deutsche Bank; World Economic Forum & Bilderberg Group Members:

Deutsche Bank, Bilderberg & WEF Members: EoP Crisis Management Option for Deutsche Bank Systemic Chain Reaction Collapse

This is a multitasking correspondence: to inform (a) prior recipients of EoP legal or other correspondence; who may not be aware that the Ecology of Peace v Masonic War is Peace negotiations websites were hacked and deleted – which included copies of all legal documents and correspondence in: (i) Complaint to Austria Federal Police: LPD Tirol; Austria Ministry of Interior: Wien Federal Office for Prevention of Corruption; Swiss Federal Office of Police; Swiss

Federal Dept of Justice & Police: General Secretariat: [EoP v Bilderberg Group & World Economic Forum: Charges: Fraud & Threat to National Security](#); (ii) EoP Axis: EoP Amicus Request to UK v Thomas Mair [[PDF](#)]. discussions for their reinstatement by Weebly; are not yet resolved; (b) provide Bilderberg and World Economic Forum members and related Deutschebank and WiP Ponzi Casino economy players; with an updated version of the Ecology of Peace Wealth Transfer Option – i.e. honourable race, class and religion relations deindustrialization and depopulation return to ecological carrying capacity limits root cause problem solving ‘crisis management’ – suggestion with regard to Deutsche Bank Systemic Breakdown Might Start a Chain Reaction Collapse; submitted to: (i) [USA, Nato, Russia and China EoP Axis Officials](#); CC: Intl Law: UN & ICC; JCS & US Navy JAG; Punjab Bar Council; Pakistan Supreme Court; Min of Defence; EoP Applicants and Observers; NSA Adm Mike Rogers & FSB: Gen Alexander Bortnikov; and (ii) [State of West Virginia v EPA: No. 16-1264: Plaintiffs & Respondents: Murray Energy Co, DoJ, EPA, State Attorney Generals, Environmental & Energy NGO’s, Chamber of Commerce, Power et al Co’s; Amicus & Media. CC: US Crt of Appeals District of Columbia Circuit Judges. More info on transforming the economy to a sustainable economy: – Community Solution: \[Power of Community: How Cuba Survived Peak Oil\]\(#\); Doug Tompkins: \[The Next Economy: Transitions from Globalization to Eco-Localization\]\(#\).](#)

[1] Hacking Deletion of Ecology of Peace v Masonic War is Peace Negotiations websites on Weebly.

On the afternoon of 24 September 2016; the entire Tygae and SQSwans websites respectively at: [tygae.weebly.com](#) and [sqswans.weebly.com](#) and the account; were deleted by a suspected hacker; and consequently is showing a “404 Error - Page Not Found. Please check the URL. Otherwise, click here to be redirected to the homepage” message.

The documentation and information on Tygae and SQSwans websites related to Ecology of Peace and Masonic War is Peace negotiations; which included formal legal briefs filed in numerous court cases in South Africa, America, Europe, Russia, International Criminal Court; etc; and less formal correspondence negotiations documentation. Tygae and SQSwans were the only website’s on the entire internet of millions or billions of websites; providing information about Ecology of Peace negotiations and copies of all EoP legal submission documentation.

I do not know how long it will take for Tygae and SQSwans EoP v WiP NWO Negotiations websites and account to be reinstated on Weebly. Tygae and SQSwans links are consequently not removed from EoP Acting Clerk correspondence; giving the hacker et al the benefit of the doubt that the hacking deletion of the websites and account may be proactively resolved.

Correspondence to Weebly, San Francisco District Attorney, Police and related parties; regarding the hacking deletion of the Ecology of Peace Tygae and SQSwans websites on Weebly; including an EoP suggested FSB Alternative Dispute Resolution of the hack; are currently documented at: [SQSwans Practicing Radical Honoursty](#).

[III] Ponzi Economy Background: Re: Deutsche Bank Systemic Chain Reaction Collapse:

Ecology of Peace suggestion options for your consideration for the international collective implementation of Ecology of Wealth Transfer Option; with regard to conversion of the Economy

to an [Ecology of Peace Sustainable Economy](#); and mitigating impending Deutsche Bank Systemic Breakdown Might Start a Chain Reaction Collapse.

The lowest current estimates of International Banks derivatives meltdown crisis is \$1.4 Quadrillion.

\$1.4 Quadrillion is roughly (a) 40 times the worlds stock market; (b) 10 times the value of every stock and every bond on the planet; (c) 23 times world GDP.

So imagine the world derivatives bubble bursts tomorrow; that will reap a financial tsunami that wipes out initially all the banks; but the money the banks have been using to play these derivative casino bets; was not their own money; but the banks clients money. So all the worlds stock markets [in terms of all the financial transactions, debts and credits on their balance sheets]; every stock and every bond on the planet; and the entire worlds GDP: BANKRUPT.

At this point a massive wealth transfer will occur.

"What are written about in history books is wealth destructions but they're not really, they're wealth transfers, if you look at them the way I do, which is that before and after the Wymar hyperinflation experience they are just as many acres of farmland and buildings around and people and productive property plant and equipment. But what happened was a lot of people got wiped out and who owned those things changed hands rather violently and dramatically." – Chris Martinson; *Why Smart Money is so Nervous*

Two Wealth Transfer options:

Masonic War is Peace Wealth Transfer: Instead of 50% of the world belonging to the 1%; 90% of the world belongs to them. One percent elite become overt In Your Face Warlord slavemasters; and the rest of the 99% overt slaves. The treatment of slaves, whether they are allowed to live or procreate; or how they are to be slaughtered, is totally dependent on their Warlord slavemasters goodwill.

Ecology of Peace wealth transfer: all bankrupt banks; corporations are nationalized. All individuals owning property greater than the EoP allotted ration footprint have their property nationalized. Families who agree to cooperate by signing EoP cooperator statements; are granted confiscated nationalized property sufficient for their family to sustain their most basic shelter, food and water needs; to engage in the process of rebuilding local cooperative tribal responsible freedom communities.

Negotiations: Comments Correspondence [PDF]: Chapter 15 [PDF]: 06 May: US Senate via Senator Ben Sasse: *Re: Adult Decision-making: EoP or WiP NWO Future?*

“How can you win a cyberwarfare battle if it takes you five and a half years to recognize and staff an office? It reminds me of a story of a friend of mine who worked so-called upgrading a Tomahawk missile electronics. He upgraded it from one obsolete system to another obsolete system. It just seems as though perhaps we have too many generals and not enough high school kids and college kids; who can put this stuff together; and recognize A. that there is a problem; and B. that it needs to be addressed; sooner, not five and a half years later. The stand up of a new domain; the standup of a new capability is a hugely difficult issue inside of a culture; absent something like a Pearl Harbour or a 911. So probably the biggest mistake that we made was that we threw all sorts of cash at it. So people were naming some of their kids after cyber, just to get some of that money. We ended up with a lot of people in charge; and all of them had no votes; nobody had a yes vote. I recall when I accepted the job at Strategic Command I had 19 people in the Department of Defense who thought they were in charge of me; who thought they were my direct boss. You can't get anything done that way. So we were pretty brutal in getting that cleaned up; and getting that straight. But there are all sorts of other places where we have the same kind of problem. Some of this is this country and the way we do business; and the incentive structure. Some of it is our own fault and the bureaucracy. If you bottom up something then you are never going to break out; you are going to incrementally improve. If you take someone from the top coming down to actually breakout and do something fundamentally different. The system is not tolerant of that quite frankly. They'll eat their young. Its a very difficult thing to do particularly if everybody hasn't had their identity or property stolen; then they go 'why do i have to do this?'. I am doing just fine the way I am. Don't let this desire for a unique vocabulary be taken over because the young lance corporal that is out there in the field, needs it to be as straight-forward as possible. They need to be able to speak the language. ... we have to keep it simple; so that everyone that can or needs to use it, can use it. Inside the inner agency of government there is the question who should be in charge of it. In China; we can make sure they know when we are not happy. .. We have enough capability to do that. They may have a lot of money, but they are operating on a thinner margin than we are for too many of their people being unemployed. The more they get; the more dangerous things become. They have more unemployed than we have citizens. So that is a huge problem for them, so if they start slowing down their economic machine they have a lot of people that get out of work and it starts to get a significant problem for them. So there is more than one kind of tool to be used here. You don't want to use them capriciously and you don't want to use just economic tools. Are we really going to get an opportunity for a peace dividend, so to speak? Where we all just go home for a couple of years and get better and all those types of things? Not likely? The demographics go against it. The world population demographics. The energy demographics. The water demographics. The food demographics. All are against it. ... So we have a long term problem in front of us. The question is what do we want to be as a nation; as we look at that? ... So the question is at this inflection point; which way do we want to go as a country; and more importantly which way do we want to take this country for our children; because that is the decision that we are really making? We have to think about that. Right now we are doing a budget drill; we are just trying to figure out; what we can afford with the money we have. The reality is that we ought to be doing an inward look here: what do we want to be and what do we want this country to be for our children? Because that is the more important question right now. Many people in our society have not had something stolen from them. So when you talk to them. I need you to give up some of your privacy so I can go and find these viruses. They say No. I don't see the value in it. I don't see why I would do that. Historically we are a nation that requires

something like a Pearl Harbour before we get our act together and go after something and we are willing to give up.” -- James E. Cartwright - [Cyber Warfare and Special Ops: A General Weighs-In](#).

Other Peak Oil documentaries: [Crash Course](#), [Oil Smoke & Mirrors](#), [Blind Spot](#), [End of Suburbia](#), [What a Way to Go: Life at the End of Empire](#), Peak Oil Solutions documentary: [The Power of Community: How Cuba Survived Peak Oil](#). Population: [The Population Elephant in](#)

[the Room](#): concludes: "The final graph is the outcome of the full simulation. It starts from our current population and shows the combined effects of a declining net birth rate and the excess death rate due to falling carrying capacity as described above. The goal of the model has been met: it has achieved a sustainable world population of one billion by the year 2082. The human cost of such an involuntary population rebalancing is, of course, horrific. Based on this model we would experience an average excess death rate of 100 million per year every year for the next 75 years to achieve our target population of one billion by 2082. The peak excess death rate would happen in about 20 years, and would be about 200 million that year. To put this in perspective, WWII caused an excess death rate of only 10 million per year for only six years."

Ecology of Peace De-industrialization and Depopulation:

EoP submissions regarding orderly and humane deindustrialization and de-population; can be found in among others: EoP NWO Options: EoP Axis Admin: Ft Bragg [[PDF](#)]: Revolution in Military Ethics: Defining just and unjust actions in war and military conflict: the operative question: Whom should the military kill? Who should be removed from the planetary genepool, how should they be removed, how many should be removed, by whom and when should they be removed?

[III] EoP Wealth Transfer Options to shut down Casino Ponzi Economy:

EoP Axis Nationalization of Individuals Property:

All individuals owning property greater than the EoP allotted ecofootprint ration – as detailed under: *Ecology of Peace New Economy Sustainability Definition* paragraphs – will have their property nationalized.

An EoP allotted ecofootprint ration of nationalized property shall be provided to any citizen who has no property; who has signed a *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration*; for their use; to enable them to sustain their most basic shelter, food and water needs; and engage with neighbours into local food production cooperatives; to begin the process of rebuilding local cooperative tribal responsible freedom communities.

EoP Axis Nationalization of Banks & Corporations:

All Banks from Bank of International Settlements; Inter-American Development Bank; APRACA: Asia-Pacific Rural to the Agriculture Credit Association; to traded and privately owned corporations shall be nationalized. The Derivatives Market will go through bankruptcy proceedings and both the Derivatives Market and Stock Exchanges will be shut down.

The 'right to breed and consume with total disregard for ecological carrying capacity limits' clauses of the Masonic War is Peace social contract shall be removed and replaced with Ecology of Peace clauses that restrict all the worlds citizens of all races, religions and classes to procreating and consuming below ecological carrying capacity limits; relating with others in accordance to fully informed consenting agreements; and violaters shall be eliminated from the planetary genepool. For more info on transforming the planetary economy to a sustainable economy: see: Community Solution: [Power of Community: How Cuba Survived Peak Oil](#); Doug Tompkins: [The Next Economy: Transitions from Globalization to Eco-Localization](#).

The EoP Economy shall be based upon already mined gold and ultimately a resource mix based currency standard; where all lending / borrowing and/or bartering is to be limited to consumption and production of non-renewable and renewable natural resources below Ecological Carrying Capacity limits.

Banks and/or Corporations may avoid coercive nationalization by voluntarily choosing to engage in the conversion of their corporations to EoP cooperative corporations; by giving employees the opportunity to vote whether they wish to (a) remain with the corporation and convert their former corporation to be managed in accordance to cooperative ownership principles and agree to sign an *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration*; (b) leave the corporation in accordance with with six months salary retrenchment package.

All nationalized corporations shall undergo the same employee vote process. Only individuals who have signed *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* may be considered for Cooperative Management positions.

All Corporate Pensions for all employees who have not yet retired; whether they sign *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration*, vote to remain with the corporation or be retrenched; are immediately cancelled. All Corporate Pensions for individuals who have already retired shall be notified that such pensions shall be cancelled within twelve months.

All corporate employees, including current or former pension holders; who do not own any property; who sign an *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* shall be provided with an EoP allotted ecofootprint ration of nationalized property; for their use; to enable them to sustain their most basic shelter, food and water needs; and engage with neighbours into local food production cooperatives; to begin the process of rebuilding local cooperative tribal responsible freedom communities.

Nuclear Weapons and Nuclear Energy Facilities:

All IAEA: International Atomic Energy Agency member states are to immediately draw up a report detailing how they commit to the decommission of all their Nuclear Weapons and Energy facilities; within five years.

World Coal Association: All member corporations are to immediately draw up a report detailing how they intend to support the orderly termination and closure of all coal mining and energy production with a Production Footprint above ecological renewable/non renewable carrying capacity limits; i.e. all future coal exploitation and production of non-renewable and renewable natural resources must be limited to below Ecological Carrying Capacity limits.

Breeding & Consumption Crimes of Aggression:

“Any individual who is found guilty of advocating on behalf of, legislating, enforcing, or obeying any – cultural, religious, common, statutory, constitutional, or international – ‘scarcity combatant’ social contract; which enables or advocates on behalf of human procreation, consumption or production of resources that transgress ecological carrying capacity limits, is guilty of the ‘crime of aggression act of war’.”

Crimes of Aggression Acts of War Convictions & Sentencing:

Consumption Violation Sentences:

Individuals found negligently guilty of violating consumption social contract limits; would be required to (a) relinquish their excess consumed products; and provide community service labour; to the extent of the infraction.

Individuals found intentionally guilty of violating consumption social contract limits; shall be provided the opportunity to (a) choose their preferred method of state assisted suicide; (b) be granted the opportunity to say goodbye to loved ones and (c) be eliminated from the planetary genepool by their preferred method of state assisted suicide.

Procreation Violation Sentences:

Individuals found guilty of negligently violating procreation social contract limits; would be required to be permanently sterilized.

Individuals found guilty of intentionally violating procreation social contract limits; would be required to (a) relinquish said child for adoption - if wanted to be adopted by a family - and be given their choice as to how they prefer to be humanely executed; (b) if no adoptive family is found; parents and child are to be given their choice as to how they prefer to be humanely executed.

EoP Axis Nation State Employees:

Every employee from the President down to the school janitor who is an employee of a federal, state, city or local government; is given one month to sign their *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration*; and submit it to appointed Federal, National and Local Ecology of Peace *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* Ombudsman.

All State employees who refuse to sign *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* are retrenched; with six months salary retrenchment package.

All Government Pensions for all employees who have not yet retired; whether they sign *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* or not; are immediately cancelled. All Government Pensions for individuals who have already retired shall be notified in writing; that such pensions shall be cancelled within twelve months.

All Government employees, including current or former pension holders; who do not own any property; who sign an *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* shall be provided with an EoP allotted ecofootprint ration of nationalized property; for their use; to enable them to sustain their most basic shelter, food and water needs; and engage with neighbours into local food production cooperatives; to begin the process of rebuilding local cooperative tribal responsible freedom communities.

Fully Informed Consenting Agreement Responsible Freedom Declaration.

A citizen's signed *Ecology of Peace Fully Informed Consenting Agreement Responsible Freedom Declaration* will declare that the particular citizen understands and legally agrees to the following:

I hereby declare that I understand Responsible Freedom to mean:

1. Earth is not flat.
2. Resources are finite.
3. When humans breed or consume above [ecological carrying capacity limits](#), it results in [ecological overshoot](#), [resource depletion](#) and [resource conflict](#).
4. If individuals, families, tribes, races, religions, and/or nations want to (a) sustainably protect natural resources for future generations; and/or (b) reduce class, racial and/or religious local, national and international resource war conflict; and/or (c) enable honourable, transparent and humane international cooperative de-industrialization and depopulation of the planet to return to living in accordance to ecological carrying capacity limits; they should (d) cooperate to implement an [Ecology of Peace](#) international law social contract that restricts all the worlds citizens to breed and consume below ecological carrying capacity limits; to sustainably protect and conserve natural resources.
5. The root cause of humans breeding and consuming above ecological carrying capacity limits and consequently Nation States failure to (a) avoid resource depletion and sustainable protection of national renewable and non-renewable resources for other species and future generations; and/or (b) reduce class, racial and/or religious local, national and international resource war conflict; and/or (c) enable honourable, transparent and humane international cooperative de-industrialization and depopulation of the planet to return to living in accordance to ecological carrying capacity limits; are the 'right to breed and consume with total disregard for ecological carrying capacity limits clauses of the [Masonic War is Peace](#) international law social contract'.
6. I request – and commit to support – the President and all supporting Political Party leaders; to officially and publicly begin legal International negotiations – by adopting any of the [Ecology of Peace New World Order Negotiations social contract options](#) used individually or in select combination or collectively; or other more suitable options – to implement an Ecology of Peace international law social contract; that shall (i) abolish the root 'right to breed and consume with total disregard for ecological carrying capacity limits clauses of the Masonic War is Peace international law social contract'; and (ii) replace them with Ecology of Peace clauses that require all of the worlds citizens from all races, classes and religions to [procreate and consume below ecological carrying capacity limits](#); and anyone convicted of breeding and/or consumption violations shall be eliminated from the planetary genepool.

I hereby declare that I understand Honourable Reason & Logic Problem Solving Communication Policy Discourse values to mean:

7. If I am committed to honourable discourse; and I am giving someone else the benefit of the doubt that they are committed to honourable truthseeking discussion:
 - A. I clarify my preferences; to enable people being communicated to, to clearly know what I want; and whether they are willing to engage me in entering into an agreement; to help me get what I want; and reciprocally whether I can help them to get what they may want.
 - B. I always respond to verbal and written correspondence, with a sincere honest response. If I don't have time to respond; I inform them by when they can expect a response.
 - C. I sincerely and actively listen to the evidence from any individual, irrespective of their political ideology – i.e. right wing to left wing – religion, race or culture. Active listening

means you verify that your interpretation of their statements is accurate; before concluding that you have 'heard their argument'.

- D. I focus on simplifying the issue discussed, using as much as possible descriptive words; as opposed to abstract concepts. If or where I include reference to abstract concepts; I am willing to define my meaning of that abstract concept within that circumstance.
- E. I evaluate their argument based upon the evidence they present, not their race, religion or political ideology; etc.
- F. If I am not convinced by the quality of their evidence on any particular issue; I am willing to agree to disagree on that particular issue, and cooperate if they are willing to engage in cooperative truthseeking to get better quality evidence; so that a stronger beyond reasonable doubt conclusion can be drawn on the particular issue in dispute.
- G. I remain in the conversation until we find agreement; so as to support each other on other issues that we do agree upon, which are based upon more conclusive buck stops here evidence.
- H. If or where sincere conflict arises in the discussion about the issue in dispute; I am committed to remaining in the conversation and finding a way to resolve the conflict, by allowing myself, them or both of us to get over our anger; as opposed to requiring them to suppress their anger for political correct 'lets pretend we are getting along' reasons. Once the emotional steam has been released through the conflict resolution process; both parties will find themselves in a more calm neutral space where the truthseeking conversation can proceed.
- I. If either of us decide that we are unable to resolve the conflict between us:
 - 1. If none of us are employed by the State and/or legally obligated to help each other on the particular issue of preference in dispute; we honourably terminate discussions and approach others for help to get what we respectively want.
 - 2. If one or both of us are employed by the State and/or an organization or profession legally obligated to provide support to enable resolution of the particular requested preference; we cooperatively refer the matter to an honourable discourse truthseeking arbitrator for impartial dispute resolution.
- J. If at any point during discussion; or arbitration proceedings; their evidence proves any of my evidence for any of my ideological, racial or religious working hypothesis theories or beliefs to be inaccurate; I love reason and logic more than my ego-identity and hence I am willing to publicly change my mind, on that particular subject and amend my ideological working hypothesis or belief with the new evidence provided; and if necessary to apologize.

Honourable Discourse principles are excerpted from: [EoP RH culture info](#).

Naturally anyone who refuses – without reasonable justification – to engage in aforementioned honourable discourse; is not remotely interested in peace, anti-war, or non-violent root cause problem solving of socio-economic resource war conflict; and depending on the circumstances; may consciously or unconsciously be providing their informed consent justification for the issue in dispute to be resolved by means of violence. Although honourable discourse would recommend that they be consciously made aware of how their refusal to engage in honourable discourse root cause problem solving of the issue in dispute; demonstrates their lack of commitment and sincerity to non-violent root cause problem solving.

Deception Communication Crimes of Aggression:

Fully Informed Consensual Relating Violation Sentences:

Individuals found guilty of negligently violating ‘Fully Informed Consenting Honourable Discourse’ as part of their inter-relating agreements; shall be required to attend and graduate from a Fully Informed Consenting Honourable Discourse’ communication values class; where they would learn how to communicate their preferences and relate to others in accordance to Fully Informed Consenting Communication values; and sign a *Fully Informed Consenting Agreement Responsible Freedom Declaration* to graduate.

Individuals found guilty of intentionally violating ‘Fully Informed Consenting Honourable Discourse’ as part of their inter-relating agreements; shall be provided the opportunity to (a) choose their preferred method of state assisted suicide; (b) be granted the opportunity to say goodbye to their loved ones and (c) be eliminated from the planetary genepool by their preferred method of state assisted suicide.

Ecology of Peace New Economy Sustainability Definition:

A Sustainable society practices Sustainable Procreation and Sustainable Natural Resource Utilization Behaviour; i.e. all of its citizens consume and procreate below carrying capacity. Sustainable Natural Resource Utilization Behaviour involves the utilization of renewable natural resources—water, cropland, pastureland, forests, and wildlife—exclusively, which can be depleted only at levels less than or equal to the levels at which they are replenished by Nature. The utilization of non-renewable natural resources (NNR's)—fossil fuels, metals, and minerals—at any level, is not sustainable¹.

Carrying Capacity Sustainability: I=PAT Equation:

For activities to be genuinely sustainable it must be possible for them to continue indefinitely. The impact of humanity on the environment and the demands that people place on the resources available on the planet can be summarised by what is known as the Ehrlich or IPAT equation, $I=PAT$. I = impact on the environment or demand for resources, P = population size, A = affluence and T = technology. The two most important conclusions deriving from this IPAT footprint² relationship are that: (i) the Earth can support only a limited number of people, at a certain level of affluence, in a sustainable manner; and (ii) Population and Consumption must be reduced to below carrying capacity.

Carrying Capacity aka Biocapacity Limits:

“The maximum number of individuals that can be supported sustainably by a given environment is known as its ‘carrying capacity’. Worldwide the total amount of biologically productive land and sea amounts to 12 billion global hectares (gha); or 1.8 gha each if divided by 6.7 billion each. Guerrilla Laws are drawn up in accordance with the proactive conservation policies of Bhutan³, who set aside 40% of their biologically productive to be returned to its

¹ Sustainability Defined, Chris Clugston, WakeUpAmerika

² EcoFootprint: The difference between the biocapacity and Ecological Footprint of a region or country. A biocapacity deficit occurs when the Footprint of a population exceeds the biocapacity of the area available to that population. If there is a regional or national biocapacity deficit, it means that the region is importing biocapacity through trade or liquidating regional ecological assets. Global biocapacity deficit cannot be compensated through trade, and is overshoot.

³ Bhutan Proactive Conservation: Bhutan is seen as a model for proactive conservation initiatives. The Kingdom has received international acclaim for its commitment to the maintenance of its biodiversity. This is reflected in the decision to maintain at least sixty percent of the land area under forest cover, to designate more than 40% of

natural state, for other species and wildlife conservation purposes; then that means that the total amount of biologically productive carrying capacity land available to humans is 60% of 12 billion; which amounts to 7.2 billion gha total; or 60% of 1.8 gha, which is 1 gha each. Population factor is relevant, because the more humans there are, the less biologically productive land there is for everyone else. For example:

Biocapacity limits of 6.7, 3.5, 1 Billion, 500, 250 & 100 Million:

7.2 billion global hectares of biologically productive land and water divided by (a) 6.7 billion humans, equals: 1.07 gha each; (b) 3.5 billion equals 2.05 gha each; (c) 1 billion equals 7.2 gha each; (d) 500 million equals 14.4 gha each; (e) 250 million equals 28.8 gha; (f) 100 million equals 72 gha each.

Procreation Factor:

As noted, the more people there are; the less biologically productive land there is available for everyone else. According to the research of Paul Murtaugh, the procreation factor that should be added by ecology footprint organisations to their Consumption footprint calculators, is 20 per child. [Each Child increases a parent's cumulative consumption footprint by factor of 20⁴]

Difference between Sustainable (Leaver Eco-Innocent) v Unsustainable (Taker Scarcity Combatant):

An individual's IPAT footprint is a result of: (A) Consumption Footprint multiplied by (B) Procreation Factor (Every child increases 20 Child Factor). If their IPAT footprint is below carrying capacity limits, they are an Eco-Innocent Leaver; if their IPAT footprint is above carrying capacity limits, they are a Scarcity Combatant Taker.

Total Footprint = Consumption x Procreation Factor.

To work out your Consumption footprint; you will need to use a Consumption Footprint calculator. Current online footprint calculators: Global Footprint Network⁵ (copy available at Earth Day⁶; Center for Sustainable Economy⁷; EcoCampus⁸. See more at Global Footprint's Application Standards⁹, where they detail how their calculators calculate Consumption footprints. The quiz will ask you various questions about your consumption habits, and provide you with a final consumption footprint in global hectares which is your 'consumption footprint'. For the purposes of this calculation; avoid footprint calculator quizzes that do not provide you with your final gha consumption footprint amount, such as for example: World Wildlife Fund's

its territory as national parks, reserves and other protected areas, and most recently to identify a further nine percent of land area as biodiversity corridors linking the protected areas. Environmental conservation has been placed at the core of the nation's development strategy, the middle path. It is not treated as a sector but rather as a set of concerns that must be mainstreamed in Bhutan's overall approach to development planning and to be buttressed by the force of law. - "Parks of Bhutan". Bhutan Trust Fund for Environmental Conservation online. Bhutan Trust Fund.

⁴ Paul Murtaugh (7-31-09): Family Planning: A Major Environmental Emphasis, Oregon University

<http://sqswans.weebly.com/child--ecofootprint-x-20.html>

⁵ <http://footprintnetwork.org/en/index.php/GFN/page/calculators/>

⁶ <http://www.earthday.org/footprint-calculator>

⁷ <http://www.myfootprint.org/>

⁸ <http://ecocamp.us/eco-footprint-calculator>

⁹ http://www.footprintnetwork.org/en/index.php/GFN/page/application_standards/

footprint calculator¹⁰ or Stanford International Students¹¹ (which is excellent and has great detail; but does not provide you with a final footprint in gha terms). Multiply your consumption footprint gha amount by your Procreation Factor: the number of children you have procreated multiplied by 20. The total amount is your Total Footprint.

Conclusion:
